Different from ink system pad ink cup printer and open ink system pad cup printing machine

1. It can save ink.
2. It is good for environment and health. You will not smell pungent ink smell when the pad printer is working.
3. It will be very easy to make logo on the plate, you can choose steel plate or polymer palte to make logo on it. Polymer plate is environmental material. Just expose the plate by exposure machine and clean plate with water. If you choose thin plate so you will prepare thinner photosensitive liquid developing liquid etching liquid to make logo on it.

Ceramic printing cup padding price from factory for pad printing machine
